

Friday 14th March 2025

To tie in with British Science Week we have enjoyed a week of fun science experiments. Science, even at a young age, can provide a framework for children to explore and understand the world around them. It gives children the chance to ask 'why' and 'how' questions, which are fundamental to scientific thinking and the simple experiments help children learn to make predictions, observe outcomes and draw basic conclusions.

On Wednesday we enjoyed our Little All sports class which focused on gym and movement. The children did a great job of following the course of equipment which helped them to work on balancing, jumping and crawling skills. Lisa is back in two weeks with an Easter themed fun class!

Our topic next week is: **Colours**

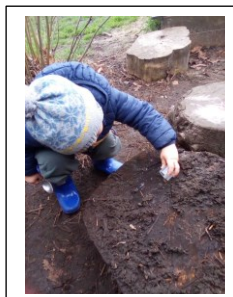

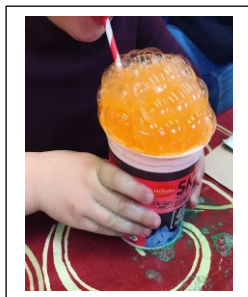

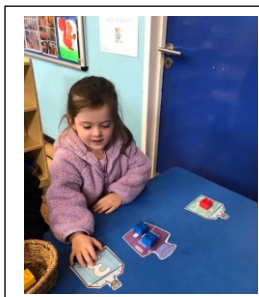

Thank you to Lucy and Rachel who came in this week to help the children with science experiments. We really appreciate you giving your time for the children and loved having you visit us.

Police Car Visit. Thursday 27th March 11am

We are very excited that PCSO Claire Harris from Surrey Police will be visiting the children at Flying Start. These visits help to strengthen the connections between the police and our community, build positive relationships from an early age and allows the children to get a hands-on experience with something that so many of them are interested in! If your child does not attend on this day but you'd like to pop down with them to join in, please come along for 11am on Tuesday 27th March. (parent/carers must stay with child)
